

Storm Clean Up Services & Guidelines

Our thoughts remain with all those impacted by recent weather. Please know, your Rumpke Waste & Recycling team is working around the clock to help clean up our communities as swiftly and safely as possible.

To help ensure your items are quickly cleared away, please follow these FEMA guidelines.

REGULAR TRASH

Please place your normal household waste containers on one side of your driveway. Rumpke will attempt to pick up your trash carts, plus up to six bags weighing no more than 50 pounds each, along with two bulk items each week.

STORM DEBRIS

Please place large storm debris on the opposite side of your driveway away from your regular trash. Please **do not** place storm debris in trash bags. Instead, place the debris curbside in the categories below. Be careful not to obstruct roadways or storm drains. Please attempt to place debris away from fire hydrants, trees, poles, utility boxes and other structures.

HOW TO PREPARE STORM DEBRIS:

LARGE APPLIANCES

- According to federal law, Freon containing appliances require a refrigerant recovery statement. The statement is available at rumpke.com.

FURNITURE

- Mattresses and upholstered furniture must be wrapped in plastic.

ELECTRONICS

- Television sets cannot exceed 32-inches for curbside collection.

YARD WASTE

- If possible, please break yard waste down into four foot by four foot pieces and bundle it.

CONSTRUCTION DEBRIS

- Bulky items like drywall, concrete and wood should be piled curbside.

HOUSEHOLD HAZARDOUS WASTE

- According to Federal law, Rumpke is not permitted to accept batteries, liquids, combustible materials or any items identified as hazardous. Please separate these other items at your curb. Please remember paint must be solidified with kitty litter or saw dust and completely dried before disposal. Paint cans should be left open. Other hazardous items may be handled separately through your solid waste management district.
